Introduction

DELTA CUP 2026

At Delta Electronics, we are driven by the vision of a 'Smarter Greener Together' future. Our corporate mission to provide innovative, clean, and energy efficient solutions for a better tomorrow guides everything we do, from pioneering smart energy systems to advancing global automation.

The **Delta Cup** is more than just a competition. Beyond this, it is a legacy of innovation that began in 2014 to bridge the gap between academic theory and real-world industrial applications. Historically organized annually by **Delta Electronics Thailand**, this signature event has served as a catalyst for talent development, empowering the next generation of engineers to solve critical industrial challenges.

2026 marks a historic milestone. For the first time, Delta Thailand is expanding the Delta Cup to universities across **Southeast Asia and Australia**. This expansion is designed to ignite a regional movement of sustainable innovation, growing awareness of green technologies while fostering cross-border collaboration among the brightest minds in the region under the theme: **“Smart Power, Intelligent Systems, Sustainable Future”**.

The Delta Cup 2026 features two specialized competition tracks: **Automation** and the newly launched **Energy** track. By adding a focus on power electronics alongside our traditional automation pillar, we are empowering the next generation of engineers to design comprehensive solutions for both smart manufacturing and sustainable energy.

We are not just looking for winning projects. We are looking for you**.** The Delta Cup is our premier platform to explore and recruit the top-tier talent who will join our global team to shape the future of smart manufacturing. Whether your passion lies in energy management or advanced automation, this is your chance to gain industry-expert mentorship, showcase your technical expertise, and take the first step toward a career with a global leader. ***“Join us in Thailand for the Regional Final, and let’s build a smarter, greener world together."***

Key Dates & Timeline (Tentative)

MAY 2026 | Promotion period	
Ongoing – 31 May	Submit your interest
JUNE 2026 | Call for Proposals	
1 June – 25 August ***(EXTENDED)***	Application & **Proposal Submission**
JULY-AUGUST 2026 | Evaluation & Qualification	
25 August ***(EXTENDED)***	Final Call for Submissions
SEPTEMBER 2026 | Finalists Revelation	
Early September	Official **Announcement of First-Round Shortlisted Teams** to Pitching Round
Mid-September	**Pitching** Rounds (Online)
Late September	Announcement of the "**Top 20" Regional Finalists**
OCTOBER 2026 | Technical Defense - Official Finalists Kick-off	
To be announced	Senior Referee Review (Top 20 Teams): Online technical review
To be announced	Delta Cup 2026: Official Finalists Kick-off & Travel Coordination
NOVEMBER 2026 | The Regional Final Round (Thailand)	
12 November	Arrival & International Welcome
13 November	Delta Visit and Cultural Experience
14 November	Regional Final Competition

All dates are tentative and subject to change. Participants will be notified in advance of any updates.

What You Gain from Delta Cup 2026

The Delta Cup 2026 is more than a technical contest. It is a gateway for the next generation of engineers to transition from academic theory to the front lines of industrial innovation. By joining this regional movement, participants gain access to significant rewards, international networking, and direct career pathways.

1. **Prestigious Rewards and Global Recognition**

Competing at this level brings not only prestige but substantial financial support to further your innovation:

- **Grand Prizes:** Compete for top honors with prize pools reaching up to **5,000 USD**.
- **Finalist Support:** Each of the 20 finalist teams will receive 500 USD to support their project development and participation.
- **Special Awards:** Exceptional teams have the chance to win optional special awards based on criteria like technical execution, disruptive creativity, and real-world applicability.

2. **Fully Funded Regional Final Round in Thailand**

The top teams from across the region will be invited to showcase their prototypes at the **Regional Final in Thailand**. Delta provides a full budget offer for this trip, covering:

- **Round-trip airplane tickets**
- **Accommodation** for the duration of the event. This allows you to focus entirely on your performance and networking while experiencing Thailand, the heart of Delta’s regional manufacturing and solution hub.

3. **Elite Regional Networking & Cross-Border Collaboration**

As the Delta Cup expands from a national to a **regional platform**, you will enter an elite league of engineering talent from across **Southeast Asia (SEA) and Australia.** This is your opportunity to:

- Compete with the brightest minds in the region and benchmark your skills against international standards.
- Exchange knowledge and see how students from different cultural and academic backgrounds approach the challenges of "Smart Power" and "Intelligent Systems".

- Build social capital by connecting with a regional network of peers who will be the future leaders of the industry.

4. Real-World Experience and Expert Mentorship

Delta Cup 2026 acts as an **"Innovation Bridge,"** connecting your classroom knowledge to real-world industrial and business fields.

- Expert Insight: Gain direct access to world-class industry experts and technical directors who serve as mentors and judges.
- Build Real Projects: Work with Delta's advanced industrial technologies to build prototypes that solve pressing global issues, such as net-zero reality and energy management.
- Business Perspective: Learn to pitch your ideas not just as technical designs, but as viable business solutions, mirroring the expectations of professional industry pitching.

5. Direct Career Pathway with a Global Leader

Delta Cup is our **primary scouting ground** for the leaders of tomorrow. We are looking for future colleagues who embody our vision of a **"Smarter. Greener. Together."** future.

- **Talent Discovery:** High-performing participants are identified for potential talent hiring opportunities within Delta's global operations.
- **Career Fast-Track:** Finalists gain a significant advantage in recruitment, providing a direct pathway to join a global team dedicated to pioneering smart energy and automation infrastructure.

Awards

Finalist Selected 20 teams	Regional final round	
500 USD	Grand Prize	5,000 USD and Trophy
	2nd Prize	2,000 USD
	3rd Prize	1,000 USD
	Special Awards x 4 • Best Innovation Award • Best Sustainability Impact • Best Technical Excellence • Best Presentation	500 USD

Competition Regulations and Guidelines

Eligibility Criteria

To ensure a high standard of academic and professional excellence, participants must adhere to the following requirements:

1. **Academic Standing:** The competition is open to currently enrolled undergraduate and graduate engineering students (bachelor's and master's degrees). All participants must maintain active student status at the time of application.
2. **Regional Scope:** Enrollment must be within qualified institutions located in Southeast Asia &Australia.
3. **Team Composition:** Teams may consist of a maximum of four (4) members. While the appointment of an academic advisor is optional, it is encouraged for technical guidance.
4. **Participation Limits:** Everyone is restricted to membership in a single team. Dual participation across multiple projects is strictly prohibited.
5. **Competition Tracks** (Each team may select and participate in only one track):
   - **Track 1: Automation**

     Focused on the evolution of digital production, this track challenges teams to develop **Intelligent Industrial Solutions**. Participants are expected to leverage advanced technologies to enhance manufacturing efficiency and operational

excellence. To drive the future of high-precision, data-driven manufacturing environments.

Key Focus Areas: Industrial Internet of Things (IIoT), Robotics & Motion Control, Machine Vision, AI-Driven Systems, and Smart Factory Integrated Solutions.

- **Track 2: Energy**

  In alignment with global carbon neutrality goals, this new track focuses on **Sustainable Energy Innovation**. Teams are encouraged to explore cutting-edge power electronics to support an energy-efficient and greener future. To pioneer innovative solutions for sustainable energy consumption and advanced power distribution.

  Key Focus Areas: Renewable Energy Systems, EV Charging Infrastructure, Battery Energy Storage Systems (BESS), and Intelligent Power Management Solutions.

Competition Structure

The Delta Cup is structured into three distinct phases designed to evaluate technical rigor and innovation. English is the assigned language for all documentation, presentations, and correspondence.

1. **Phase I: Proposal Submission:** All registered teams must submit a formal project proposal within the designated application window. ***Please note****: Missed the Pre-Submission Form? You can still submit your full proposal. We welcome all eligible student teams to participate. Link: Delta Cup 2026: Application & Proposal Submission*
2. **Phase II: Pitching Round:** Qualified teams will advance to an online pitching session. There is no fixed quota for this stage; advancement is based on the merit of the initial proposal.
3. **Phase III: Regional Final:** A maximum of **20 distinguished teams** will be selected from the Pitching Round to compete in the onsite Regional Final hosted in Thailand.

Submission Protocols and Technical Requirements

1. **Project Standards**

- **Originality:** Submitted projects must be the original work of the team and must not have received prior awards in other international or domestic competitions.
- **Thematic Alignment:** Projects must demonstrate a primary focus on either the **Energy** or **Automation** tracks.
- **Exclusivity:** A team is permitted to submit only one (1) project for consideration.

2. **Proposal Methodology**

Submissions must utilize the Official Delta Cup Application Form including team information and an uploaded proposal template (as appendix). The proposal is expected to be a comprehensive document covering:

- **Project overview and objectives:** A concise overview of the project and its core objectives.
- **Technical concept / solution:** A detailed explanation of the engineering concepts and proposed solutions.
- **Innovation and impact:** An analysis of the project's unique value proposition and its potential for broader impact.
- **Feasibility and implementation plan:** A logical plan for feasibility, development, and implementation.

Note: Supplemental materials, such as a demonstration video or presentation slides, are highly encouraged. If slides are utilized, teams must adhere to the **Official Delta Cup Template**. Late or incomplete submissions will not be reviewed.

Assessment Rubric

Projects will be rigorously evaluated by an expert panel based on the following weighted indices:

- **Innovation & Creativity:** Novelty of the approach and creative problem-solving.
- **Technical Viability:** The soundness of the engineering principles and the likelihood of successful execution.
- **Impact & Sustainability:** The project's contribution to environmental goals and its long-term social or industrial value.
- **Communication Excellence:** Clarity, professionalism, and the ability to articulate complex technical ideas.

Regional Final and Logistics

- **Presentation Requirements:** Shortlisted finalists are required to attend the Regional Final in Thailand. Teams are strongly encouraged to present a functional prototype or a working model but must stay under 7 kg carry-on limit and comply with international airline safety regulations. In instances where physical transport of equipment is not feasible, a high-definition demonstration video must be prepared.
- **Travel and Accommodation Sponsorship:** Delta Electronics (Thailand) Public Company Limited will provide **full sponsorship** for travel and accommodation for all qualifying international finalists.
- Teams are required to bring their National Flag for the regional ceremony, and the use of institution-specific flags is encouraged for brand visibility.

Recognition and Awards

- The Delta Cup recognizes excellence through both financial grants and merit-based prizes:
    - **Finalist Honorarium**: The 20 teams selected for the Regional Final will each receive a grant of USD 500.

- **Grand Prizes**: Finalists will compete for top-tier awards with a total value of up **to USD 5,000 and Trophy**.

- All prizes are subject to withholding tax and other applicable taxes under Thai law.
- All judging decisions are final and binding. Delta reserves the right to amend the competition rules, evaluation criteria, and rewards at its sole discretion. Any such changes will be communicated through official channels.

Intellectual Property and Ethical Conduct

- All intellectual property right in the submitted innovations shall remain the exclusive property of the participating teams.
- By entering the competition, Participants grant Delta a royalty-free, worldwide license to use submitted materials for promotional purposes. Submissions must be original and not infringe on any third-party rights. Delta reserves the right to disqualify any participant for rule violations or unprofessional conduct.
- Participants are expected to demonstrate professionalism and respect throughout the competition.
- Any violation of the competition rules may result in disqualification.

General Terms

- By participating, participants consent to Delta Electronics collecting and processing their personal data for competition purposes in compliance with PDPA and applicable privacy laws.
- All non-public information disclosed during the competition must be kept confidential. Participants are responsible for protecting their own patentable ideas before submission.
- This competition is governed by the laws of the Kingdom of Thailand. Any disputes shall be subject to the exclusive jurisdiction of the Thai Courts.

The Official Delta Cup 2026 Proposal Template

Please acknowledge that this form is mandatory to upload in **The Official Delta Cup Application Form**

DELTA CUP 2026

Smart Power, Intelligent Systems, Sustainable Future

Team Information			
University Name		**Country of University**	
Team name			
Team member	**1.**	**2.**	
	3.	**4.** *if an academic advisor is included, please add '(Advisor)' after name*	
Team Captain Tel.		**Team Captain Email**	
Team Group Photo	*Please provide one team photo of about 2 MB in size.*		
Project proposal			

Project name		**Track**	*<Automation/Energy>*
Project overview and objectives **(up to 500 words)**	*Why does this project exist?* *What specific pain point in Automation or Energy are you solving?*		
Technical concept / solution	*Guideline (Not mandatory to follow, attached photo is optional)* • **System Architecture:** High-level overview of how the system components interact or optional attach illustrations such as a technical architecture diagram • **Hardware Design:** Detail the power electronics components (Inverters, converters, PLCs, sensors). • **Software & Logic:** Explain the control algorithms, UI/UX, or AI integration. • **Technical Specifications:** Efficiency ratings, power consumption, response times, and safety protocols.		
Feasibility and implementation plan	• **Testing Protocol**: how will you prove the system work before the competition day • **Gantt Chart/ Timeline**: Break down the project into phases e.g., research, procurement, Assembly, testing, final • **Budget & Resource Allocation:** A list of components needed and their estimated costs. • **Risk Management:** Identify top 3 technical or logistical risks (e.g., component lead times, software bugs) and how the team plans to mitigate them		

Innovation and impact	*What makes this unique?* *<u>Guideline</u> (not mandatory to answer, attached photo is optional)* • **Innovation Factor:** How is this different from existing solutions? Is it cheaper, faster, more energy-efficient, or more scalable? • **Environmental Impact:** Quantify the "Green" aspect. Does it reduce CO2 emissions? Does it save energy? • **Social & Economic Impact:** How does this help the local industry, universities, or the workforce? • **Scalability:** Could this project be turned into a real product?
Demonstration	*Including but not limited to photos, videos (which may be uploaded separately as attachments), and web links.*
